REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose, teach or suggest a method for tattooing the skin, comprising the steps of: applying to the skin, under pressure, a transparent window/vehicle carrying a light absorber and tattoo material; and illuminating the light absorber through the window so that the light absorber, after absorbing sufficient optical energy, drives the tattooing material into a skin region to produce a tattoo as presently claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

US Patent No. 6,881,249, to Anderson et al. discloses tissue marking system and methods of use for tattooing skin, the system comprising a transparent material containing light absorptive particles adapted to be dispersed in a living tissue after receiving sufficient optical energy. However, the reference fails to clearly teach the method in which the marking system is applied to the skin, such as pressure/contact. The reference further fails to teach the use of separate light absorber and tattooing material as presently claimed.

US Patent No. 5,817,089, to Tankovich et al. teaches a method for tattooing the skin by applying light absorptive particles to the skin, and applying optical energy to the skin region to drive said particles into the skin (see col. 8, lines 5-35). However,

Art Unit: 3735

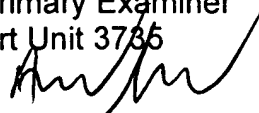

Tankovich et al. fails to teach the use of light vehicle containing a separate light absorber and tattoo material as presently claimed.
